HELP GUIDE

Nelson Maths for the Australian Curriculum IWB

Overview

This product is intended not as a series of activities for students to complete, but rather a set of tools for teachers to use as they see fit to support and augment the teaching and learning of maths in the Australian curriculum. With this in mind, many of these Nelson Teaching Objects have been created without a 'right answer'. For information and ideas about how to use the NTOs in the classroom, see the Teacher's Resource Book. The following Help information and the Tips for each individual NTO explain how the program works.

Using this product

Menu

- Select a rectangular button on the main panel to navigate to that NTO. NTOs are numbered (Year [point] Number within level) e.g. 1.5

- Use the circular numbered buttons and arrow buttons on the side to scroll up and down to more NTOs.

- Use the Help tab to navigate to this help document. Tips for using individual NTOs can be found on the NTO screens.

- Select Switch controls to move the navigation buttons to the other side of the screen.

NTO

- Select Tips for information on how to use the NTO functions.

- Select Reset to return the NTO to its original state.

- Select Back to return to the Menu

Technical notes

- When you try to run a **Nelson Maths NTOs IWB**, you will be prompted to install Adobe® AIR® if you do not already have it. This is a program that supports the transition of rich content to your desktop.

- The **Nelson Maths NTOs IWB** software is designed to run on all interactive whiteboards. Different types of whiteboards have different features, which will enhance the user's experience of this product in varying ways.
